

The no-fuss workhorse.

When there's work to be done, put your trust in the robust, versatile Grizzly 300. Its engine delivers impressive levels of torque and traction in the shape of a compact, manoeuvrable ATV, which is equally at home on grasslands or hilly terrain.

Under its no-nonsense styling, the Grizzly 300 has been refined for exceptional performance. Its automatic transmission and gearbox – with simplified High and Low ratio settings – eliminate the need for clutch and gear operation and the suspension package keep the ATV firmly on the ground.

Add the comfy wide seat and handy carriers for working tools, and you've got a ride that keeps your focus where it belongs: on the job at hand.

- Liquid-cooled, 287cc engine with impressive torque
- Automatic Constantly Variable Transmission (CVT)
- New gearbox for optimal manoeuvrability
- Easy to operate, easy to ride
- Hydraulic disc brakes for secure stopping
- Long-wheel travel suspension
- Distinctive Grizzly styling
- Professional, no-nonsense, back-to-basics design
- Flat carriers front (20 kg) and rear (45 kg)
- 22inch Maxxis front tyres & rear tyres

Yamaha Utility ATVs

Yamaha Utility ATVs are built with one goal in mind: easing the workloads of those in tough outdoor environments.

This philosophy is engineered in every detail. Like torque-heavy engines that get you moving when terrain is tricky, or loads are heavy; effort-reducing technologies like automatic transmission and Electric Power Steering; and ergonomic designs which mean you'll still feel comfortable after a long day in the saddle. Plus, they run economically and require low maintenance.

Yamaha Utility ATVs are tireless workhorses - but that's not all they are. When time permits, these vehicles pack the punch to give riders a big dose of fun, too.

287cc liquid cooled engine

The power of the Grizzly 300 belies its size. Its 4-stroke, single-cylinder, 4-valve engine delivers deep torque in the low to mid-ranges, for pulling off with a full load. At higher speeds, it provides strong, agile power, for a great driving feel. A single axle balancer reduces vibration and smoothens engine performance.

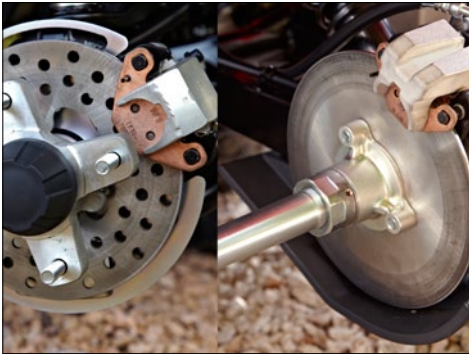

Refined gearbox

The Grizzly 300 is all about convenience. A centrifugal clutch and Constantly Variable Transmission (CVT) do away with the usual hassle of gear changes. Instead, riders select Low (L) or High (H) ratios while idling, depending on whether they need the grunt for towing heavy loads, or smooth power for relaxed riding. Reverse gear enhances manoeuvrability.

Long-travel adjustable suspension

Double wishbone suspension at the front keeps the tyres in contact with the ground for longer – even when the terrain is uneven. Excellent straight-line stability and a natural steering feel help to ward off the effects of rider fatigue. Monocross rear suspension can be adjusted to suit the load you're carrying and the conditions.

Front and rear disc brakes

Riding with confidence means riding knowing that you have the brake performance you need. The Grizzly 300 is kitted with responsive hydraulic disc brakes at both the front (175 mm) and the rear (220 mm). Remarkable linear response comes courtesy of specially developed pads.

Styled for work

The new, refreshed Grizzly 300 combines a compact, easily manoeuvrable build with comfortably spacious seating – making long days in the saddle an effortless pleasure.

Front and rear flat carriers

Flat steel carriers fitted to the Grizzly 300's compact body can accommodate up to 20 kg of equipment at the front, and 45 kg at the rear. This is an ideal way to transport essential tools without having to pull a trailer.

Engine

Engine type	Single cylinder, liquid-cooled, 4-stroke, SOHC, 4-valve
Displacement	287cc
Bore x stroke	75.0 mm x 65.0 mm
Compression ratio	8.6 : 1
Lubrication system	Wet sump
Fuel system	Carburettor CVK32
Ignition system	CDI
Starter system	Electric
Transmission system	Automatic CVT, L/H/N/R
Drive system	2WD
Final transmission	Shaft

Chassis

Front suspension system	Independent double wishbone, 151 mm stroke
Rear suspension system	Swingarm, 141 mm stroke
Front brake	Dual hydraulic disc
Rear brake	Hydraulic disc
Front tyres	AT22x7-10
Rear tyres	AT22x10-9

Dimensions

Overall length	1,895 mm
Overall width	1,069 mm
Overall height	1,124 mm
Seat height	794 mm
Wheelbase	1,199 mm
Minimum ground clearance	136 mm
Min. turning radius	3.15 m
Fuel tank capacity	10.7 litres
Oil tank capacity	1.4 litres

Loading limits

Front rack	20 kg
Rear rack	45 kg

Additional features

Steering System	Ackermann-type

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements. Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®; our own range of high-tech lubricants, the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you ride.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative riding gear designed to keep you comfortable and protected. An extensive range of casual wear is also available. For more information go to:

www.yamaha-motor-acc.com

ATVs with engines up to 70cc are recommended for use only by riders 6 years and older and always with adult supervision. ATVs with engines of 70 to 90cc are recommended only for use by riders 12 years and older, and always under adult supervision. ATVs with engines of 90cc or greater are recommended for use only by riders 16 years and older. ATVs are built to operate within their design limits. Safe towable weights, together with maximum carrying capacity are identified in the owner's manual if applicable. For durability, reliability, but most important of all, operator safety, under no circumstances should the recommended capacities be exceeded. Yamaha recommends that all ATV riders take an approved training course. For safety and training information, see your dealer or call your Yamaha Distributor in your country. ATVs can be hazardous to operate. For your safety: always avoid paved surfaces. ATVs are designed for unpaved surfaces only. Riding on paved surfaces may seriously affect handling and control and can cause loss of control. Always wear a helmet, eye protection and protective clothing. Never carry any passengers. Never engage in stunt riding. Riding and alcohol/drugs don't mix. Avoid excessive speed and be particularly careful on difficult terrain. Please 'tread lightly': always ride in a responsible manner, respecting the environment as well as country and local laws. The riders in this brochure are professionals: don't attempt to emulate them. The specification and appearance of Yamaha products will be varied from time to time without notice, and as shown here are illustrative only and are not a contractual description of products. Some models are shown with optional accessories. All ATVs come with a 12-month Limited Factory Warranty, except for Banshee, which carries a 90-day Limited Factory Warranty. See your dealer for details. Please check the availability of the colours of the model(s) at your local Yamaha dealer.
