

Sharp. Dressed all in black. Ready to race.

Rider and machine in perfect harmony. At one with each other and with the water. That's how races are won and maximum enjoyment achieved. That's the SuperJet.

The awesome power and acceleration of the race-bred 2-stroke engine is blended with a sleek, ultra-light hull. Supreme agility and control is the SuperJet's trademark, with the ability to out-carve rival racers by diving deep on the inside and turning like a sharp blade.

The unique ergonomic design and spring-assisted steering pole and handlebar lead the rider naturally into the comfortable lean-forward position, the ideal not only for competition, but for spirited sport riding. The SuperJet is ready – and waiting.

- High-performance, 2-cyl 2-stroke engine
- Lightweight, deep-strake hull & wide front section
- Hyper-Flow 144mm jet pump & adjustable nozzle
- Race-developed stainless steel impeller
- New, shorter spring-assisted steering pole
- Optimised intake duct pump and ride-plate position
- Electronically controlled ignition timing
- Automatic bilge control system
- Yamaha loop-charged combustion
- Corrosion protection system
- Slip-resistant padded foot tray

The choice of champions and pro racers

The SuperJet™ is the trusted weapon of choice for many of the world's leading champs and pro racers. It lets them ride like their machine is almost an extension of their body - which is why the SuperJet stands out so convincingly from the rest. "Much quicker and more stable than any other stand-up I've ever ridden - it gives me huge confidence to attack the turns."

"Amazingly agile, with incredible grip and bite on the water - I know I can go out and win with this!"

"Easy and less tiring to ride - the wide-front hull, the clever, spring-assisted handle pole design and the great lean-forward riding position make a big difference."

High-performance 2-stroke engine

The SuperJet is powered by a high-performance, two-cylinder, 701cc Yamaha engine. Two 38mm Mikuni® carburetors feed this world-class power plant, providing excellent throttle response throughout the total RPM range. Loop-charged combustion helps to distribute fuel/air mixture evenly for better combustion, performance and fuel economy.

Lightweight, deep-strake hull with wide front section

Perfectly balanced for hard cornering and straight-line speed, the SuperJet's lightweight deep-strake hull features moulded-in sponsons. Positioned forward on the craft, they increase the wetted surface area of the hull. This allows the craft to turn more easily while also making the SuperJet more stable.

Optimised intake duct pump and ride-plate position

To increase dynamic stability and straight-line running performance within the limited space of the hull, the ride plate is positioned far aft – effectively lengthening the waterline. The pump itself is also positioned far aft, providing stable pump performance even in choppy water.

Hyper-Flow jet pump and adjustable steering nozzle

The SuperJet 144mm Hyper-Flow jet pump propulsion system is designed to maximise water flow for high performance. The SuperJet pump configuration provides excellent hook-up and smooth acceleration.

Race-developed stainless steel impeller

The SuperJet's stainless steel impeller was developed with the feedback from racers. Fluid analysis technology was used to realise its super-efficient, high-performance design – a design that delivers superior acceleration and speed.

Spring-assisted steering pole

The spring assisted steering pole and handlebars have been specially designed to provide a riding position that allows you to get the most out of the SuperJet – a machine built for winning. The result is a forward-leaning riding position that always puts riders in the most ideal stance for competition.

Engine	
Engine type	2-cylinder, 2-stroke
Supercharger	-
Displacement	701cc
Bore x stroke	81.0 mm x 68.0 mm
Compression ratio	7.2 : 1
Cooling system	Water-cooled
Pump type	144 mm Axial Flow
Fuel	Unleaded Regular Gasoline
Fuel supply system	Floatless Carburettor Mikuni BN38 x 2
Fuel capacity	18.0 litres

Lubrication system	Pre-Mixed oil/fuel
Oil capacity	-
Dimensions	
Length	2.24 m
Width	0.68 m
Height	0.66 m
Dry weight	139 kg
features	
Storage capacity	-
Rider capacity	1 person

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements. Yamaha Marine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®. Yamalube® is our own range of high-tech lubricants, the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you drive.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative boating gear. An extensive range of casual wear is also available. For more information go to:

www.yamaha-motor-acc.com

All information in this brochure is given for general guidance only and is subject to change without prior notice. We should all exercise POWER WITH RESPONSIBILITY and help preserve the great sporting opportunities and enjoyment we all derive from our involvement with personal watercraft. You must recognise too, that your Yamaha WaveRunner is actually a boat, so please learn and follow all the rules of the sea and waterways, take professional instruction where possible, and obey local rules and regulations, which may differ greatly from area to area. The photographs featured show boats being driven by professionals and no recommendation or guidance in respect of safe operation or style of use is intended or implied by the publication of any of these images. Read all instruction materials carefully before setting out and ALWAYS wear recommended protective clothing and a life preserver or lifejacket when boating. NEVER DRINK AND RIDE.
